Background Story

In a magical world, you are **Maegi**, an undergraduate student at Magic University, and you want to join a famous magician association called the Night. The **President** of the association assigns you a task, which is to seal some magical objects that are out of control. To find them, you have to navigate three dungeons hiding the objects.

In the dungeon, you need to battle for the **Parapsychologist's Mirror**, the **Star Sceptre**, and the **Bloodstained Armor**.

Background Story

If you fail to beat the objects, you become contaminated. You can beat the boss to earn coins. Or you can go to the magicfield on the ground to practice your battling skills in a dream, where you have infinite lives.

You can also spend coins on stronger skins with more lives and bombs from **Merchant**. They are helpful in the battles with magical objects.

When you are successful in sealing all objects, you will become a member of the Night.

Characters

Maegi

President

Merchant

Game Levels

Level 1

The Parapsychologist's Mirror

Level: Dangerous

Description: It was an ordinary mirror belonging to a parapsychologist. After the parapsychologist died, the mirror developed some strange capabilities.

Everything the mirror reflects becomes strange.

Capabilities: Create mirrors to reflect on all bullets.

Seal method: Put it in a definitely dark room.

Game Levels

Level 2

The Star Sceptre

Level: Dangerous

Description: Description: It used to be a traveler's walking stick but got contaminated on a dangerous journey. Everything it touches will become any object depending on how the person who carries it thinks. But the carrying person maybe become the same object too.

Capabilities: Larger bullets.

Seal method: Do not let it touch anything!
